

# Jerome Tolentino

## Software Developer

Full stack developer with an array of diverse skills building web apps since 2020 while being an educator. I am passionate about web development and always continually learning something new to make better apps and technologies.

## Projects

### Heya Music Social App

React | Redux | Django REST | AWS S3 | PostgreSQL

Built a social network that lets users see what songs their friends are listening to. Utilizing the open sourced Spotify API, clients are able to search any songs to their profiles stored in PostgreSQL. User avatars and images are stored using AWS S3.

### Trayn Weightlifting App

React | Redux | Node | Express | MongoDB | Tailwind

Built a fitness journal app that tracks the progress of weightlifters' sets and repetitions in the gym using full CRUD functionality stored in No SQL, MongoDB. Clients can see a calendar heat map and bar graphs of their workout sessions throughout the week using D3.js.

### Saponify Ecommerce Site

React | Stripe API | Commerce.js | Tailwind

Built a fully functioning ecommerce site with a sleek landing page that sells artisan soaps using Stripe API and a headless CMI as its backend.

## Experience

### English Educator

Sagan Speak Languages Services

April 2017 - Present

English educator leading interactive lessons to over 35 students.

- Collaborating well with other coworkers to carry out classes
- Planning interactive presentations and lessons every week
