JEROME TOLENTINO

Web Developer

I am a self-taught full stack web developer building web apps since 2020 while working as a teacher. I am passionate about web development and looking to land a full stack engineer position at a company that values collaboration and delivering quality products to clients.

Personal Projects

Heya Music Social App
React | Redux | Django REST | AWS S3 | PostgreSQL

Built a social network that lets users see what songs their friends are listening to. Utilizing the open sourced Spotify Web API, clients are able to add any songs, albums, and artists to their profiles.

Trayn Weightlifting Tracker App
React | Redux | Node.js| Express | MongoDB | Tailwind

Built a fitness journal app that tracks the progress of weightlifters' weights and repetitions in the gym using full CRUD functionality. Clients can see a calendar heat map and bar graphs of their workout sessions using D3.js in the dashboard.

Saponify Ecommerce Site
React | Stripe API | Commerce.js | Tailwind

Built an ecommerce site with a sleek elegant landing page that sells artisan soaps using Stripe API to handle purchase processing.

Experience

English Educator
Sagan Speak Languages Services
April 2017 - Present

English educator leading interactive lessons to over 35 students.
• Collaborated well with other coworkers to carry out classes
• Planned interactive presentations and lessons every week
